- Location: Home office and Garching
- Work load in average: 15h/week

Interested in innovative building design and climate change? Want to help us communicate our value proposition and work with our mentors? Want to see a product launch first hand? Then help our experienced team and learn a thing or two on the way!

CAALA is looking for a writer who can help in communicating our value proposition. While the work is challenging, the atmosphere is friendly. This job description is not intended to be all-inclusive. The writer may perform other related duties as negotiated to meet the ongoing needs of the organization.

Want to join our Team?

We are about to launch our Software and make an impact on CO₂ emissions in the construction industry by supporting architects in the building design phase. Over the past 4 years, we developed a real-time analysis optimization software to enhance the energy efficiency of buildings and further support quantified and rational investment decisions

We are currently funded by the Federal Ministry for Economic Affairs and Energy, the European Social Fund, the Federal Ministry for the Environment, Nature conservation, Building and Nuclear Safety (national climate change initiative) and Climate-KIC. CAALA was selected as one of the Top 500 technology startups worldwide and was awarded the StartGreen award 2016.
